Alex Johnson

Senior Backend Engineer
alex.johnson@candidates-demo.com · Lyon, France · linkedin.com/in/alex-johnson-demo

Summary

Backend engineer with 6 years building high-traffic REST APIs in Python. Comfortable owning a service from design to production on AWS.

Experience

Senior Backend Engineer — Orbit Labs (2022 – present)

- Lead a team of 4 maintaining a payments API (Python, FastAPI, PostgreSQL) serving 2M requests/day.
- Cut p95 latency by 40% by redesigning slow SQL queries and adding Redis caching.
- Containerised all services with Docker and deployed them on Kubernetes (EKS) on AWS.

Backend Engineer — Quantum Freight (2019 – 2022)

- Built REST APIs in Python (Django REST Framework) for shipment tracking.
- Designed the PostgreSQL schema and wrote migrations; introduced CI with GitHub Actions.

Skills

Python, FastAPI, Django, REST APIs, SQL, PostgreSQL, Docker, Kubernetes, AWS (EC2, RDS, S3), Redis, CI/CD

Education

BSc Computer Science, Université de Lyon, 2018
